- UL listed in accordance with UL-5C requirements for Class 2 Communication Cable Management Systems
  - Maintains bend radius control throughout the entire Office Furniture Raceway system as required by TIA/EIA 568-B and 569-A
  - Faceplates are compliant with the labeling requirements of the TIA/EIA-606-A standard
  - Robust design and tamper resistant closure increases product stability and prevents damage to cabling during and after installation
  - Product supplied with adhesive backing for fast and easy installation
  - Creates a virtually invisible solution for routing data cables on panels from all common manufacturers with a top cap width between 1.88" and 2.30"
- Pan-Way*® Office Furniture Raceway is designed to route data cabling along the top of office partitions. The system includes a full complement of fittings, accessories and termination options which allows you to terminate at any point along the partition at desk level or in the corner at the intersection of two partitions. *Pan-Way*® Office Furniture Raceway System
